

Intersections: The LGBTI II Survey – Migrant and Racial, Ethnic and Religious Minorities Analysis

In the sixth of our series of Intersections reports, deep-diving into the data from the European Fundamental Rights Agency (FRA) 2019 LGBTI Survey II, we have collaborated with Equinox Initiative for Racial Justice, to further understand the challenges faced by racialised LGBTI people in Europe today.

Disaggregated data, which can look deeply into the lived experiences of marginalised people, is a key demand of LGBTI and other human rights groups. With this in mind, over the last year ILGA-Europe have been partnering with a variety of NGOs in the region to analyse the FRA 2019 LGBTI Survey II data and pull out experiences of those experiencing intersectional marginalisation. This work is based on analysis co-commissioned by ILGA-Europe and TGEU.

This briefing seeks to elaborate on existing analysis of the FRA LGBTI Survey II, and summarises the most relevant data about the experiences of LGBTI persons in Europe with a migration background coming from outside of EU, LGBTI non-migrant ethnic minorities and LGBTI religious minorities in the EU.

To understand the challenges faced by LGBTI migrants from outside of the EU and belonging to ethnic or religious minorities, we created sub-populations of respondents, who identified themselves as belonging to these groups, and compared them with all respondents to the survey.
