

The Rainbow Map Podcasts

The Rainbow Europe Map and Index has become a flagship project for ILGA-Europe since it was first published in 2019. The Map ranks all 49 European countries based on the laws and policies in each to ensure equal rights and protection for LGBTI people. Countries are ranked from zero percent to one hundred, with zero representing gross violations of human rights and discrimination and one-hundred representing full respect for human rights and equality. Here you can listen to the podcasts we have published over the past few years going into the findings and background of the Rainbow Map.
